

## Anti Wave EndWalls

The Anti Wave Hitec Endwall is designed to provide a safe and efficient means of managing competition and fitness swimming in an overflow or 'wet deck' pool environment. Our advanced and innovative Pultruded DRP EndWall is chemical and UV resistant in even the most demanding facility environments. Precision engineering and production ensure that FINA tolerances are maintained.

### Key Features:

Suitable for competitive events and normal competition or training. Enables the installation of starting blocks and timing equipment in pools designed with overflow gutters.

- No exposed metal components
- No earthing required
- FINA Approved, suitable for competitive events and normal competition and training
- Enables the installation of starting blocks and timing in overflow pool environments
- Can be used with all popular timing systems including Omega, Daktronics and Colorado
- Simple, modular assembly and installation
- Gratings on top and sides ensure quick and easy cleaning of the channel with EndWall in place
- Constructed from extruded Fibre reinforced plastics
- Non-slip removeable Polypropylene gratings
- 316 stainless steel fixings (internal)
- Manufactured using UV inhibitors for outdoor use
- Custom engineered solutions for each facility

## EndWall - FRP

### Anti Wave EndWall - Modular FRP

The Anti Wave Endwall is designed to provide a safe and efficient means of managing competition and fitness swimming in an overflow or 'wet deck' pool environment.

- Easy to install and simple to remove and store.
- Suitable for competitive events and normal competition or training.
- Enables the installation of starting blocks and timing equipment in over flow pool environment.

- Movable gratings on sides ensure quick and easy cleaning of the channel with endwall in place.
- Can be used with most popular timing Systems and touch pads.
- Non-slip surface provides positive confirmation of the end of the pool to the swimmer as well as safe and speedy exiting of the pool.
